

AMENDMENTS TO THE DRAWINGS

Please substitute the attached Replacement Sheets of drawings for the corresponding originally filed drawing sheets.

The drawings are amended herein to clarify reference character ambiguity and conform reference character numbering to amended portions of the Specification.

In the Replacement Sheets, Figure 1 and Figure 5 have been amended to replace the reference character for the protective panel attached to the inner forearm surface of the forearm portion of each sleeve, proximate to the wrist opening on the sleeve. The reference character for this protective panel in both figures has been amended to read “15,” distinguishing this protective panel from other separate protective panels also attached to the garment. Protective panel 15 is mentioned in the description, at least at paragraph [0011].

Also in the Replacement Sheets, Figure 4 has been amended to add the reference character “15” to the drawing. This amendment indicates that the construction of the protective panel 12 and the construction of the protective panel 15 are both represented by the drawing in figure 4. The construction of protective panel 15 is mentioned in the description, at least at paragraph [0011].
